

GERMAN ROACH TREATMENT PREP LIST

BEFORE THE TREATMENT

- ★ Remove the contents of all cabinets, pantries and cupboards. Place them away from kitchen and other treated areas.
- ★ Move refrigerator away from wall to give access to back of the refrigerator.
- ★ Place medical breathing equipment in air tight containers.
- ★ Seal exposed food or ingestible liquids in air tight containers.
- ★ Put toothbrushes and contact lens away.

AFTER THE TREATMENT

- ★ Sweep and vacuum dead roaches until no more are found. This includes inside cabinets, dressers, closets, etc.
- ★ It is safe for children and pets to return to treated area once product has dried.
- ★ It is normal to see live roaches for up to 3-4 days after treatment. **Do not** spray any other products, it might interfere with treatment.
- ★ **IMPORTANT:** Do not mop hard surface floors until 1 week after the treatment.
